

Exercise 1 in devops

Start Docker Desktop

Open Windows Powershell in administrator mode

minikube delete

choco install minikube

minikube start

kubectrl run hello-k8s --image=nginx --port=80

kubectrl get pods (re run it may take some time to get generated)

kubectrl expose pod hello-k8s --type=NodePort --port=80

minikube service hello-k8s
